The units are available in several standard sizes or designed to suit your requirements. They may be stacked or arranged in a variety of configurations.

Compact housing units are constructed using our Composite Construction System to produce a durable, highly insulated and portable buildings.

A typical stack of 8 no. compact housing units with communal walkways forming a crucifix. Each of these units is 6 m x 3m externally and has a bedroom, shower room and kitchen/living room .

Economical and fast construction systems for energy efficient, sustainable buildings

Advantages:

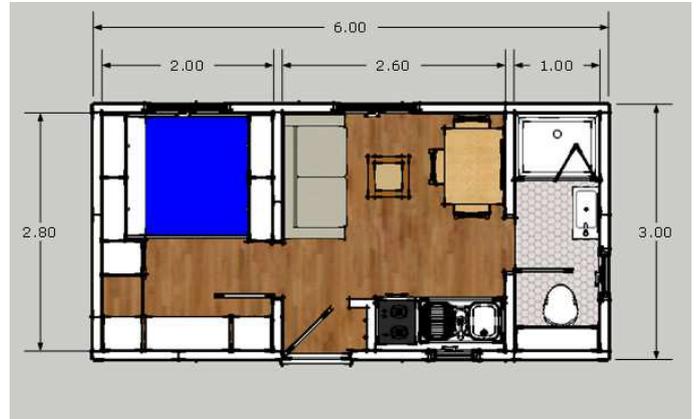

- **High performance**
- **Economical**
Basic 6 x 3 metre module from £9,950
- **Robust, durable and strong**
- **Low energy bills**
Insulated construction reduces heating and air conditioning loads to minimise cost.
- **Comfortable and airtight**
No cold bridging or draughts
- **Fast and efficient build process**
The units are moved into position and simply connected to mains services.

Standard units are:

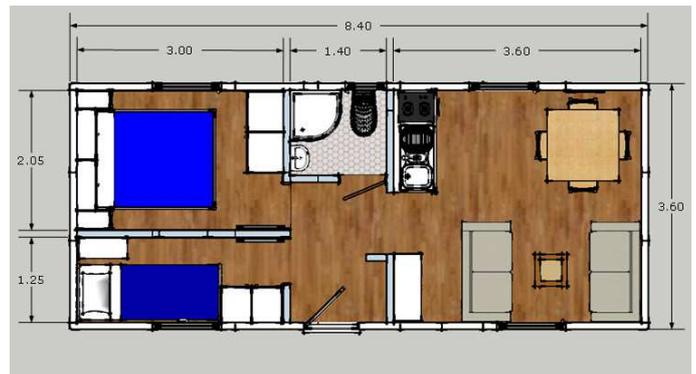

3 metre x 3 metre modules

Approximate floor area of 7.6 m²

These modules may be arranged in a number of configurations or stacked to suit your requirements

A typical 6 metre x 3 metre one bed unit
Approximate floor area of 15.9 m²

A typical 8.4 metre x 3.6 metre two bedroom unit
Approximate floor area of 27.4 m²

Typically, units will have a kitchen that includes a mini space saver kitchen with a sink, two ring hot plate, refrigerator and microwave oven and a shower room with electric instantaneous shower W.C. and hand basin. Units are pre-wired and plumbed ready for connection to mains services.
